

GW Career Coaching

Our Mission

The Career Learning and Experience team empowers, prepares, and challenges our GW students to achieve high levels of career readiness and explore what it means to become a positive changemaker. We celebrate the rich diversity of our GW community and work to address barriers as we advocate for accessible, equitable, and inclusive opportunities for our students.

Monumental Proximity

Our unique location in the nation's capital provides students access to professional opportunities alongside industry leaders in politics, science, business, engineering, health, media, and the arts. Our vast and diverse network of internships, service opportunities, career education resources, and alumni mentors allow students to leverage all that can be found Only at GW – start your journey here.

Professional Confidence

We support students' career readiness by forwarding their self-efficacy and development of our GW Professional Competencies in two key ways:

- 1) By integrating career learning programs into the academic and campus life experience.
- 2) Through hands-on experiential learning at internships, on and off-campus employment, and volunteer opportunities; the skills you build here will make a difference.

Global Impact

We empower future leaders to explore their interests, strengths, and potential as they endeavor to impact our local and global communities and be Revolutionaries for good. Our career coaches foster a collaborative environment as we challenge GW students to find what drives them and to connect their purpose to their career development.
